MAGT1	STXBP2
MEFV	TNFRSF1A
MVK	UNC13D
NLRC4*	XIAP

This test does not guarantee coverage over 20X of all the coding regions of all genes on this list. Some exons of these genes are difficult to sequence and will result in lower coverage. Select low coverage regions will be filled in by Sanger sequencing on a per-case basis. Please contact the laboratory for detailed coverage information related to genes or samples of interest.

*Companion deletion/duplication analysis is not included for this gene
